Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Automotive USB Charging Modules competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Automotive USB Charging Modules are integrated electronic units designed for vehicles that provide USB power output for charging mobile devices such as smartphones, tablets, GPS units, and other USB-powered electronics. These modules convert the vehicle's power supply (typically 12V DC) into standard USB output voltages (such as 5V, 9V, or 12V) and often support fast-charging protocols like QC (Quick Charge), PD (Power Delivery), or proprietary standards. The core driving force of the in-vehicle USB charging module market comes from the popularization of new energy vehicles, the upgrading of user needs and technological innovation, but it is necessary to deal with the differentiation of technical standards and safety risks. In addition, the iteration of wireless charging technology (such as magnetic resonance technology) may divert some user needs, but it is difficult to replace the compatibility advantage of USB in the short term. From the perspective of manufacturers, the core manufacturers of in-vehicle USB charging modules worldwide mainly include Casco (Amphenol), Molex, MD Elektronik, Aptiv, Keboda Technology and Luxshare Precision. In 2024, the top five manufacturers in the world will account for a total of 26% of the market share. The functions of in-vehicle USB charging module manufacturers are highly homogeneous, and differentiation depends on the software ecosystem (such as linkage with the car machine), but most manufacturers have not yet formed a technical barrier. Competition will be more intense in the future.

The global Automotive USB Charging Modules market size was estimated at USD 1378.0 million in 2025 and is projected to grow at a compound annual growth rate

(CAGR) of 3.40% during the forecast period.
