### Report Overview

The Automotive Wiper Assembly is a critical component of a vehicle's safety system, designed to clear rain, snow, and debris from the windshield, ensuring optimal visibility for the driver. This assembly typically consists of a wiper arm, wiper blade, and a motor-driven linkage system. The wiper arm is a metal or plastic structure that connects the wiper blade to the wiper motor, while the wiper blade is a rubber-edged strip that comes into contact with the windshield to remove water and dirt. The motor-driven linkage system powers the wiper arm, allowing it to oscillate back and forth across the windshield. The assembly may also include additional features such as a wiper transmission that converts the motor's rotational motion into the linear motion of the wiper arm, and a park switch that stops the wipers at a specific position on the windshield. The Automotive Wiper Assembly is engineered to withstand various weather conditions and is an essential part of maintaining safe driving conditions.
