Report Overview

Azadirachtin Technical is a naturally occurring chemical compound extracted from the seeds of the neem tree (*Azadirachta indica*). It is a potent biopesticide known for its insecticidal properties, primarily used in agricultural and horticultural applications to control a wide range of pests. Azadirachtin Technical is valued for its ability to disrupt the life cycle of insects, acting as an insect growth regulator and feeding deterrent without causing direct harm to the target pests. This product is often used as an alternative to synthetic pesticides, offering a more environmentally friendly and sustainable solution for pest management. It is particularly effective against insects that feed on plant sap, such as aphids, whiteflies, and caterpillars, and is also known to repel some species of mosquitoes. Due to its natural origin and multifaceted mode of action, azadirachtin is considered a key component in integrated pest management strategies, helping to reduce the reliance on chemical pesticides and promote a healthier ecosystem.
