### Report Overview

A baby push walker is a type of developmental toy designed to help infants and toddlers learn to walk. It typically consists of a sturdy frame with wheels and a handlebar that the baby can hold onto for support while pushing the walker forward. These walkers often feature interactive elements such as buttons, lights, and sound effects to engage the child and encourage them to keep moving. Baby push walkers are designed to provide stability and support while promoting motor skills, balance, and coordination as the child learns to walk independently.
