Report Overview

A ball-jointed doll, often abbreviated as BJD, is a type of articulated doll with a ball-and-socket joint structure that allows for a wide range of motion and flexibility in posing. These dolls are typically made from materials such as vinyl, resin, or silicone, and are known for their high level of detail and realism in appearance. Ball-jointed dolls are popular among collectors, artists, and enthusiasts who enjoy customizing and posing the dolls for various purposes, including photography, fashion design, and storytelling. The joints enable the dolls to be manipulated into lifelike positions, making them versatile for a range of creative expressions and artistic endeavors.
