Report Overview

Bicycle carbon fiber suspension is a suspension system made of carbon fiber materials. It is used to connect the bicycle frame and wheels. It is used to absorb shock and absorb bumps and impacts during riding, improving riding comfort and stability. Carbon fiber suspension is often used in models that require a high-performance suspension system, such as high-end bicycles or mountain bikes. The main components of this suspension system include carbon fiber suspension arms, connectors, springs and shock absorbers. Its structure is lightweight, strong, durable and has good shock absorption effect.
