### Report Overview

A biodegradable sanitary pad is an eco-friendly alternative to traditional disposable sanitary pads, designed to provide menstrual hygiene while minimizing environmental impact. This product is made from natural, organic materials such as bamboo, cotton, or other plant-based fibers, which are compostable and can decompose naturally over time, reducing landfill waste. The biodegradable sanitary pad is designed to absorb menstrual fluid effectively, maintaining comfort and hygiene for the user. It typically features a soft, breathable top layer for skin contact, an absorbent core to retain fluid, and a leak-proof backing to prevent leakage. The pads are intended for single-use and are disposed of in a composting system, where they break down into natural elements, contributing to a more sustainable menstrual care solution.
