Report Overview

Biodegradable Twines are environmentally friendly alternatives to traditional synthetic twines, designed for various applications such as gardening, agriculture, and packaging. These twines are made from natural, plant-based materials, such as cornstarch or other biodegradable polymers, which break down over time when exposed to soil, moisture, and microorganisms. The primary purpose of biodegradable twines is to provide support and stability to plants, secure items during transportation, or hold objects together without causing harm to the environment.
