Abstracts

In the past year, blockchain has become a controversial global phenomenon, with the technology perceived as either a solution for whatever ails society or 'rat poison squared' as Warren Buffet describes Bitcoin. In 2018, we are witnessing the launch of blockchains carrying commercial traffic and moving beyond proof-of-concept (PoC) demonstrations, though the selected applications have yet to demonstrate the capacity and scale of credit card networks. Blockchain-powered international trade finance coming online is just one example. The blockchain ecosystem is replete with innovating startups prompted by amazing cryptocurrency valuations. Blockchain entrepreneurs find a reason to tokenize anything and everything and move quickly toward an initial coin offering (ICO), the largest of which recently exceeded \$4 billion, though funds were denominated in another cryptocurrency, Ethereum.

The global Blockchain For Enterprise Applications market size was estimated at USD 11865.42 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of 46.32% during the forecast period.
