Report Overview

Boron nitride release coating is a type of coating used in various industrial applications, particularly in manufacturing processes where a non-stick surface is needed. Boron nitride is a chemical compound composed of boron and nitrogen atoms, and when used in coating formulations, it imparts excellent release properties. This means that materials such as adhesives, plastics, or metals are less likely to stick to surfaces coated with boron nitride release coating, making it easier to remove them from molds, tools, or processing equipment.
