Report Overview

Business process management or BPM is a process or group of processes that helps to optimize and improve the business performance of an organization. BPM is used to achieve consistent and targeted results as per the company's strategic goal. BPM as a service refers to the business processes integrated with cloud services such as SaaS, PaaS, and IaaS. BPM as a service provides various advantages such as improved visibility in business processes, virtual workplaces, improved performances, and helps in decision making. The BPM solution optimizes business processes through various components such as process design, process engines, rules engines, and process analytics and increases the profitability of the organization. It is also used to simulate, automate, and monitor business processes in various sectors such as Human Resource (recruitment, training, and performance management), Sales and Marketing (pre-sales and post-sales), Manufacturing (invoicing), CRM (accurate and up-to-date information), and R&D (better infrastructure and effective management of processes) of any organization.
