Report Overview

Calcium Aspartate is a dietary supplement that combines calcium, an essential mineral for various bodily functions, with aspartic acid, an amino acid. This product is designed to enhance the bioavailability and absorption of calcium in the body, which is crucial for maintaining strong bones and teeth, proper muscle function, nerve transmission, and blood clotting. Calcium Aspartate is particularly beneficial for individuals who need to increase their calcium intake, such as those with osteoporosis, pregnant or lactating women, or those with dietary restrictions that limit their calcium consumption. The aspartate component aids in the chelation of calcium, making it more soluble and thus more easily absorbed by the body's cells, which can lead to improved overall calcium utilization and health.
