Report Overview

Camouflage materials are specialized textiles, coatings, or pigments designed to conceal or blend objects, vehicles, or individuals into their surrounding environment. These materials function by mimicking the visual, thermal, or radar signatures of the environment, thereby making it difficult for observers or detection systems to identify the concealed object. Camouflage materials can be found in various applications, such as military gear, hunting attire, and outdoor equipment, where stealth and concealment are crucial. They are often engineered with specific patterns, colors, and textures that correspond to different terrains, such as woodland, desert, or urban settings.
