### Report Overview

A cashew nut shell oil press machine is a mechanical device used to extract oil from the shells of cashew nuts. Cashew nut shells contain a viscous oil known as cashew nut shell liquid (CNSL), which has various industrial applications due to its unique chemical composition. The press machine applies mechanical pressure to the cashew nut shells, squeezing out the oil contained within them. This extracted oil can be used in industries such as automotive, paint, varnish, and resin manufacturing, among others. The machine typically consists of components such as a hopper for feeding the shells, a pressing mechanism, and an outlet for collecting the extracted oil.
