### Report Overview

Cassia Oleoresin is a concentrated, aromatic extract derived from the bark of the Cinnamomum cassia tree, commonly known as Chinese cinnamon. This product is obtained through a process of solvent extraction, which separates and concentrates the essential oil and other volatile compounds responsible for the distinct flavor and aroma of cassia. Cassia Oleoresin is widely used in the food and beverage industry as a flavoring agent, offering a rich, warm, and slightly sweet taste that is characteristic of cinnamon. It is also valued for its potential health benefits, such as antimicrobial and anti-inflammatory properties, and is sometimes used in pharmaceutical and cosmetic products due to these attributes.
