Report Overview

Chlorine Resistant Spandex is a specialized type of synthetic fiber designed to maintain its integrity and elasticity in chlorinated environments, such as swimming pools. Unlike regular spandex, which can degrade quickly due to the harsh chemicals in pool water, chlorine-resistant spandex is engineered with additives that protect the fibers from the damaging effects of chlorine. This material is highly valued for its durability, stretchability, and resistance to fading, making it ideal for swimwear, activewear, and other garments that require frequent exposure to water and chlorine. The product's composition typically includes a blend of spandex and other fibers, such as polyester, that enhance its performance and longevity, ensuring that it retains its shape and comfort even after extended use in chlorinated settings.
