Report Overview

Cinnamon Oleoresin is a concentrated, aromatic extract derived from the bark of cinnamon trees, specifically *Cinnamomum verum* or *Cinnamomum cassia*. It is obtained through the process of solvent extraction, which involves soaking cinnamon bark in a solvent, typically ethanol or a hydrocarbon, to separate the essential oils and other soluble components. The resulting product is a dark, viscous liquid that retains the characteristic flavor, aroma, and color of cinnamon. Cinnamon Oleoresin is widely used in the food and beverage industry as a flavoring agent, in pharmaceuticals for its potential medicinal properties, and in the cosmetics and perfumery industries for its fragrance. It offers a more potent and consistent alternative to ground cinnamon, as it contains a higher concentration of the active compounds responsible for cinnamon's taste and smell.
