Report Overview

Circular knitting needles, also known as circulars or double-pointed needles, are a type of knitting needle used for creating items in the round, such as socks, hats, and sweaters. They consist of two shorter needles connected by a flexible, usually plastic or metal, cable. This design allows the knitter to work in a continuous loop without having to join new balls of yarn or turn the work, making it ideal for circular knitting projects. The needles come in various lengths and sizes, typically ranging from 24 to 47 inches in length, and are available in various materials including aluminum, bamboo, carbon fiber, and stainless steel. The choice of needle material and size can affect the feel and performance of the knitting, with some materials being lighter or warmer to the touch, and different sizes accommodating different yarn thicknesses and gauges.
