Report Overview

Citrus Bitters is a type of aromatic bitters, a category of alcoholic beverages that are flavored with botanicals and used as a cocktail ingredient or digestive aid. It is characterized by a blend of citrus flavors, typically derived from various citrus fruits such as lemons, limes, oranges, and grapefruits. These bitters are made by infusing the zest and sometimes the juice of these fruits into a high-proof alcohol, often along with other botanicals like herbs, spices, and roots. The resulting product has a complex, tangy, and slightly bitter taste that can enhance the flavor profile of cocktails, particularly those that benefit from a citrusy twist. Citrus Bitters are often used in small quantities to balance sweetness and add depth to mixed drinks, making them a versatile component in the craft cocktail movement and a staple in many bartenders' toolkits.
