Report Overview

Clear Aligner TPU Material refers to a type of thermoplastic polyurethane (TPU) material specifically designed and utilized in the production of clear aligners, which are orthodontic devices used for teeth straightening. This advanced material is characterized by its high elasticity, durability, and transparency, making it an ideal choice for creating custom-made, comfortable, and virtually invisible aligners. TPU's unique properties allow for precise tooth movement over time, as it can be molded to fit the individual's teeth and apply the necessary pressure for gradual alignment.
