Report Overview

Cod Fish Collagen Peptides is a dietary supplement derived from the skin and bones of cod fish. It is a highly purified form of collagen, which is a structural protein found in the human body, particularly in the skin, hair, nails, and connective tissues. This product is specifically designed to provide the essential amino acids required for the synthesis of collagen in the body, which can help support skin health, joint function, and overall tissue repair. The peptides in this product are hydrolyzed, meaning they are broken down into smaller, more easily absorbed molecules, allowing for better bioavailability and faster absorption into the bloodstream.
