Report Overview

Cold Chain Logistic Extruded Polystyrene Sheet (XPS) is a high-performance insulation material specifically designed for use in cold chain logistics and refrigeration applications. This product is made from extruded polystyrene, a closed-cell foam material that provides excellent thermal insulation properties. The XPS sheet is characterized by its lightweight, rigid structure, and moisture resistance, making it ideal for maintaining consistent temperatures in cold storage facilities, refrigerated transport vehicles, and other temperature-controlled environments. Its closed-cell structure also offers high compressive strength and resistance to water vapor, which helps prevent condensation and maintains the integrity of the insulation over time. The product is designed to reduce energy consumption and enhance the efficiency of temperature management in cold chain logistics, ensuring the preservation of perishable goods during transportation and storage.
