Report Overview

Cold Pressed Organic Juice is juice extracted from organic fruits and vegetables by cold pressing. This process uses hydraulic presses to press fruits and vegetables at extremely low temperatures (usually 0-4 degrees Celsius) to maximise the retention of their natural nutrients, enzyme activity, vitamins and minerals, while maintaining the original flavour. The cold pressing process does not use high temperature heating or oxidation, nor does it add preservatives or other chemicals, and is therefore considered a healthy beverage option that keeps food in its natural state.
