Cold therapy equipment refers to medical and therapeutic devices designed to deliver controlled cooling to targeted areas of the body for pain relief, inflammation reduction, and post-surgical recovery. These products include ice packs, gel wraps, compression cold therapy systems, and specialized machines like cryotherapy chambers that use extreme cold for whole-body treatment. The market is driven by increasing demand in sports medicine, orthopedics, and post-operative care, as well as rising awareness of non-pharmacological pain management.
