### Report Overview

A Combustible Gas Alarm is a safety device designed to detect and alert individuals of the presence of combustible gases in an environment. This product is crucial in preventing gas-related accidents, fires, and explosions. It functions by monitoring the concentration of combustible gases, such as natural gas, propane, or butane, in the air. When the gas levels reach a predetermined threshold, the alarm triggers a loud audible signal and/or visual indication, alerting occupants to evacuate the area or take necessary safety measures.
