## Abstracts

Commercial Hydrogen Dispensers are devices designed to dispense hydrogen at hydrogen refueling stations and to achieve seamless, safe and time-efficient fueling of vehicles. It is one of the most important components in a hydrogen eco-system. According to the Filling Pressure level, Hydrogen Dispenser mainly includes 35 MPa and 70MPa, and other less used types include 23MPa and other types. Government support and policies play an important role in driving the growing popularity of hydrogen vehicles. Governments provide financial incentives and subsidies to promote the purchase and use of hydrogen vehicles. These include tax credits, grants, rebates or direct subsidies to reduce the upfront costs or operating expenses associated with hydrogen vehicles. Financial incentives make hydrogen vehicles more affordable and attractive to consumers, thereby increasing market demand. Public awareness and environmental awareness are important factors driving the adoption of sustainable transportation solutions, including hydrogen vehicles. Public awareness of the urgency of combating climate change continues to grow. As the effects of global warming become more apparent, people are becoming more aware of their carbon footprint and are looking for ways to reduce their environmental impact. Hydrogen vehicles have the potential to reduce greenhouse gas emissions and provide a solution for sustainable transportation. The increasing emphasis on sustainable and environmentally friendly solutions will stimulate the vitality of the hydrogen filling machine market. The core manufacturers of global Commercial Hydrogen Dispensers include Linde, Jiangsu Guofu Hydrogen Energy Equipment and Houpu Clean Energy. The top three companies have a market share of about 28%. Asia (excluding China) is the world's largest Commercial Hydrogen Dispensers with a market share of about 40%, followed by China and Europe with a market share of 35% and 18%, respectively. In terms of product types, 35 Mpa is the largest segment with approximately 78% market share. In terms of applications, Medium and Large Hydrogen Fueling Station is the largest downstream

segment, accounting for about 61% of the market share.
