Report Overview

A Commercial Vehicle Leaf Spring is a type of suspension component specifically designed for use in commercial vehicles such as trucks and buses. It is a critical part of the vehicle's suspension system, responsible for absorbing road shocks and maintaining the vehicle's stability and ride comfort. The leaf spring is constructed from multiple layers of spring steel, which are stacked and bolted together to form a single unit. These layers, or leaves, flex under load, allowing the spring to absorb the impact of uneven road surfaces and distribute the weight of the vehicle evenly across its axles.
