Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Commercial Vehicle Low Voltage Power Distribution Modules competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Commercial vehicle low voltage power distribution modules are essential components in the electrical systems of commercial vehicles, responsible for managing and distributing low voltage electrical power (typically 12V or 24V) throughout the vehicle. Commercial Vehicle Low Voltage Power Distribution Modules (LV PDU) are essential electrical components responsible for distributing and protecting the 12V/24V low-voltage systems in both traditional and new energy commercial vehicles. They manage circuits related to lighting, infotainment, air conditioning, cameras, radars, and auxiliary charging systems. Driven by increasing electrification and smart features in commercial vehicles, LV PDUs are transitioning from basic fuse boxes to intelligent, integrated modules. Modern LV PDUs feature real-time diagnostics (voltage, current, temperature monitoring) and CAN communication, improving operational efficiency. Architecturally, the market is shifting from centralized to distributed LV PDUs, especially in electric light trucks and buses, reducing wire harness complexity and improving vehicle efficiency. Product-wise, Relay-based PDUs remain mainstream, but Solid-State PDUs (MOSFET-based) are gaining traction in premium commercial EVs due to faster response and higher durability. The LV PDU market is expected to grow at a CAGR of 10-15%, with smartization and solid-state solutions as key trends, especially in China's NEV boom and Europe's smart vehicle applications.

The global Commercial Vehicle Low Voltage Power Distribution Modules market size was estimated at USD 1673.0 million in 2025 and is projected to grow at a compound

annual growth rate (CAGR) of 8.10% during the forecast period.
