### Report Overview

Computer and Gaming Glasses are specialized eyewear designed to enhance visual comfort and reduce strain during prolonged use of digital devices, particularly for gaming. These glasses are equipped with lenses that typically have a blue light filter to protect the eyes from the harmful effects of high energy visible (HEV) light emitted by screens. They may also feature an anti-reflective coating to minimize glare and improve visual clarity. The frames are often designed with ergonomics in mind, providing a comfortable fit for extended periods of wear. Additionally, some models may incorporate features like polarized lenses to reduce eye strain further or specific tints to optimize color perception and contrast, which can be particularly beneficial for gamers seeking a competitive edge. Overall, computer and gaming glasses aim to improve the user's visual experience while mitigating the potential negative impacts of digital screen time on eye health.
