Report Overview

Concentrated fruit syrups are thick, viscous liquids made by extracting and condensing the natural sugars and flavors from fruits. This process involves removing a significant portion of the water content from the fruit juice, which results in a more intense flavor and higher sugar concentration. These syrups are often used as sweeteners, flavor enhancers, and natural colorants in various culinary applications, including beverages, desserts, sauces, and baked goods. By preserving the essence of the fruit in a concentrated form, they offer a convenient way to add robust fruit flavors without the bulk and perishability of fresh fruit.
