### Report Overview

The corneal marker is a specialized ophthalmic surgical instrument used to create precise markings on the cornea during refractive and cataract surgeries, ensuring accurate alignment of incisions, astigmatic corrections, or intraocular lens placements. These markers are typically made of high-quality medical-grade materials like stainless steel or titanium, designed for single-use or reusable applications, and come in various configurations (e.g., circular, linear, or toric) to accommodate different surgical techniques.
