Abstracts

Most organic cow's milk formulas are made with skimmed milk that has been supplemented with a blend of organic vegetable oils to achieve a fatty acid profile similar to breast milk. Whole milk recipes are exceptional because with using the full cream of the milk, it contains naturally occurring MFGM (Milk Fat Globule Membrane) ? a critical component within breast milk linked to improved cognitive development in infants. Vitamins and minerals are also added in quantities that correspond to the correct stage of infant development.
