Report Overview

Creamed Manuka Honey is a unique, high-quality product derived from the nectar of the Manuka plant, scientifically known as *Leptospermum scoparium*. This plant is native to New Zealand and Australia, and its honey is renowned for its distinctive flavor and potent antibacterial properties. The creamed version of Manuka honey is a smooth, spreadable form that retains the natural goodness of raw Manuka honey while offering a more versatile texture for various culinary applications. It is often used in baking, as a topping for toast or pancakes, and in tea, providing a rich, indulgent taste experience. The creamed Manuka honey is also valued for its potential health benefits, which are attributed to the presence of unique compounds like methylglyoxal (MGO) and the Unique Manuka Factor (UMF), markers of the honey's antibacterial strength. This product is typically sold in jars and is a popular choice among consumers seeking a premium, natural sweetener with added health benefits.
