Report Overview

Crude Ulinastatin is a pharmaceutical product derived from human urine, specifically from the urine of individuals who have undergone surgery or trauma. It is a mixture of proteins that exhibits potent protease inhibitory activity, primarily inhibiting the activity of pancreatic enzymes such as trypsin, chymotrypsin, elastase, and kallikrein. The product is used in medical settings to treat conditions characterized by excessive protease activity, such as acute pancreatitis and pancreatitis-associated complications. Crude Ulinastatin is administered intravenously and helps to control the severity of inflammation and pain associated with these conditions by regulating the proteolytic enzymes that can cause tissue damage.
