Report Overview

De-gossypol cottonseed protein is a high-quality plant-based protein derived from cottonseeds, processed to remove toxic gossypol, making it safe for human and animal consumption. It serves as a cost-effective alternative to soy and other conventional protein sources, offering a balanced amino acid profile suitable for food, feed, and industrial applications. The market for this protein is expanding due to rising demand for sustainable and non-GMO protein ingredients, particularly in animal feed, aquaculture, and functional food products. Growth is further driven by innovations in extraction technologies, increasing awareness of plant-based nutrition, and the need for affordable protein sources in emerging economies.
