Report Overview

Desloratadine API, or Active Pharmaceutical Ingredient, refers to the pure chemical substance used in the production of desloratadine, an antihistamine medication. Desloratadine API is the key component responsible for the drug's therapeutic effects, specifically targeting the relief of allergy symptoms such as sneezing, itching, and runny nose. It functions by selectively blocking the action of histamine, a chemical released during an allergic reaction. As an API, desloratadine is typically combined with other inactive ingredients during the pharmaceutical manufacturing process to create the final dosage form, such as tablets or syrups, which are then distributed for medical use.
