Report Overview

Diclazuril Premix is a veterinary pharmaceutical product specifically designed for the prevention and treatment of coccidiosis in poultry. Coccidiosis is a common and highly contagious disease caused by protozoan parasites of the genus *Eimeria*, which can lead to significant economic losses in the poultry industry. Diclazuril Premix contains the active ingredient diclazuril, a potent anticoccidial agent that targets the coccidia parasites within the host's intestine. This product is typically supplied as a premix, which means it is a concentrated form of the active ingredient that can be easily mixed with feed to provide a consistent and effective dosage to the poultry. The premix formulation allows for precise dosing and ensures that each bird receives the appropriate amount of the medication, thereby optimizing treatment outcomes and minimizing the risk of resistance development.
