The most common use of digital forensics is to support or refute a hypothesis in a criminal or civil court:

Criminal cases: Involving the investigation of any unlawful activity by cybercriminals. These cases are usually carried out by law enforcement agencies and digital forensic examiners.

Civil cases: Involving the protection of rights and property of individuals or contractual disputes between commercial entities were a form of digital forensics called electronic discovery (eDiscovery). Digital forensics experts are also hired by the private sector as part of cybersecurity and information security teams to identify the cause of data breaches, data leaks, cyber attacks, and other cyber threats. Digital forensic analysis may also be part of incident response to help recover or identify any sensitive data or personally identifiable information (PII) that was lost or stolen in a cybercrime.
