## Abstracts

The 2025 U.S. tariff policies introduce profound uncertainty into the global economic landscape. This report critically examines the implications of recent tariff adjustments and international strategic countermeasures on Dipentaerythritol Hexaacrylate competitive dynamics, regional economic interdependencies, and supply chain reconfigurations. Dipentaerythritol Hexaacrylate is a high-viscosity, multifunctional acrylate compound with excellent hardness, abrasion resistance and chemical stability. Its upstream mainly consists of two core raw materials: dipentaerythritol and acrylic acid, derived from basic petrochemical products such as formaldehyde, acetaldehyde, isobutyraldehyde, propylene, and acrylonitrile, respectively. Downstream applications are widely distributed in UV-curable coatings, inks, adhesives, and other fields. Global sales in 2024 were approximately 30,000 tons, with an average market price of approximately US\$4,400 per ton. The scale of a single production line varies depending on the production process and investment scale of the production equipment, typically ranging from 300 to 1,000 tons per year, with industry gross profit margins ranging from 12% to 28%. Dipentaerythritol Hexaacrylate, as a high-functionality acrylate monomer, is an irreplaceable key raw material in photocurable materials systems, and its industry development reflects the trend towards high-end and green photocuring technology. Currently, with the rapid expansion of emerging fields such as UV/EB curing, 3D printing, and optical coatings, DPHA is experiencing continuously rising market demand due to its high reactivity, excellent mechanical strength, and chemical resistance. Leading companies in the industry are accelerating the development of high-purity, low-acid-value, and low-yellowing DPHA products to meet the performance requirements of high-end optics.

The global Dipentaerythritol Hexaacrylate market size was estimated at USD 132.0 million in 2025 and is projected to grow at a compound annual growth rate (CAGR) of

4.20% during the forecast period.
