Report Overview

Disposable patient gowns are single-use garments designed for healthcare settings, primarily worn by patients during medical examinations, procedures, or hospital stays to ensure hygiene, comfort, and infection control. Made from lightweight, non-woven materials such as polypropylene or polyethylene, these gowns are cost-effective, easy to dispose of, and reduce the risk of cross-contamination compared to reusable alternatives. They typically feature open-back designs with tie closures for accessibility, though variations include full-coverage styles for enhanced modesty. The market for disposable patient gowns is driven by increasing healthcare awareness, stringent infection prevention regulations, and the rising demand for efficient, time-saving solutions in hospitals, clinics, and long-term care facilities.
