### Report Overview

A dry stack boat storage system is a type of storage facility where boats are stored on racks in a covered building. This system is designed to protect boats from the elements and keep them secure when not in use. Boats are typically stored on specially designed racks that can be stacked on top of each other to maximize space efficiency. When a boat owner wants to use their boat, they simply call ahead to have it retrieved from the rack and brought down to the water for them.
