Report Overview

Elastase Powder is a specialized enzyme-based cleaning product designed to break down and remove elastin, a protein found in various materials such as rubber, latex, and certain fabrics. It is typically used in industries where these materials are prevalent, such as automotive, textile, and medical sectors. The powder form allows for easy application and control over the concentration of the enzyme when mixed with water. Elastase Powder works by catalyzing the hydrolysis of peptide bonds in elastin, effectively softening and dissolving these proteins. This makes it an effective solution for tasks such as de-inking, de-hairing, and de-sizing processes, as well as for the removal of rubber residues and adhesives. Its use can lead to improved material quality, reduced waste, and enhanced product performance in various applications.
