Report Overview

The electric skin knife is a specialized medical or cosmetic device designed for precise skin treatments, such as dermaplaning, exfoliation, or superficial skin resurfacing. It typically features a fine, oscillating blade powered by electricity to remove dead skin cells, vellus hair (peach fuzz), or minor imperfections, promoting smoother and more radiant skin. These devices are used by dermatologists, estheticians, and increasingly by at-home consumers due to the growing demand for non-invasive skincare solutions.
