Report Overview

An electromagnetic shielding sheet, as the name suggests, is a sheet for shielding. What it shields is certain electromagnetic waves. Electromagnetic waves can have a negative impact on electrical equipment in use, and in the worst case, can cause malfunctions or equipment operation to run out of control, potentially resulting in significant damage to the user. In order to suppress such adverse effects, the international standard IEC worldwide regulate the noise levels, such as noise terminal voltage and disturbance power, generated by electronic equipment in use, and these are the main countermeasure items.
