Abstracts

Electronic literature or digital literature is a genre of literature encompassing works created exclusively on and for digital devices, such as computers, tablets, and mobile phones. A work of electronic literature can be defined as 'a construction whose literary aesthetics emerge from computation', 'work that could only exist in the space for which it was developed/written/coded?the digital space'.^[1] This means that these writings cannot be easily printed, or cannot be printed at all, because elements crucial to the text are unable to be carried over onto a printed version. The digital literature world continues to innovate print's conventions all the while challenging the boundaries between digitized literature and electronic literature. Some novels are exclusive to tablets and smartphones for the simple fact that they require a touchscreen.
