Report Overview

Electronic Sorbitol Solution is a specialized liquid formulation designed for use in electronic devices, particularly those that require a non-conductive, non-corrosive cleaning agent. This solution is composed of sorbitol, a sugar alcohol that is known for its hygroscopic properties, meaning it can absorb moisture. In the context of electronics, the Electronic Sorbitol Solution serves to clean and protect sensitive components by removing dust, fingerprints, and other contaminants without causing damage due to its non-conductive nature. It is also used to prevent the buildup of static electricity, which can be harmful to electronic circuits. The solution is typically applied using a spray or wipe method, ensuring that it does not leave any residue that could interfere with the performance of the device. It is an essential product for maintaining the longevity and reliability of electronic equipment, especially in environments where humidity and dust are concerns.
