### Report Overview

Entry doors and exterior doors are essential components of a building's facade, serving as the primary access points and contributing to the overall aesthetic and security of a property. These doors are designed to withstand various weather conditions, provide insulation, and offer a high level of durability. They are typically made from materials such as wood, steel, fiberglass, or composite materials, each offering unique benefits in terms of strength, insulation, and visual appeal. Entry doors often feature decorative elements and are available in a wide range of styles, colors, and finishes to complement the architectural design of the building. Exterior doors, on the other hand, may include sidelights or transoms for additional light and ventilation, and are often equipped with advanced locking systems to enhance security. Both types of doors play a crucial role in maintaining the energy efficiency of a building by providing a barrier against heat transfer and drafts.
