### Report Overview

An EPDM Sponge Gasket is a versatile sealing component made from EPDM (ethylene propylene diene monomer) rubber, which is formulated into a sponge or foam-like material. This type of gasket is characterized by its excellent resistance to weathering, ozone, UV rays, and extreme temperatures, making it ideal for outdoor and industrial applications. The sponge structure of the gasket provides superior flexibility, compressibility, and cushioning, allowing it to create a reliable seal even on irregular or uneven surfaces. EPDM sponge gaskets are widely used in automotive, HVAC, and construction industries, where they serve as seals in doors, windows, hatches, and other components, effectively preventing the ingress of water, dust, air, and noise. Additionally, their resistance to aging and environmental degradation ensures long-lasting performance in harsh conditions, making them a preferred choice for sealing applications that require durability and resilience.
