### Report Overview

The EV OAT (Organic Acid Technology) coolant market is a specialized segment within the automotive thermal management industry, specifically designed for electric vehicles (EVs). Unlike traditional internal combustion engine coolants, EV OAT coolants are formulated to meet the unique thermal and electrical insulation requirements of EV battery systems, power electronics, and electric motors. These coolants feature advanced organic acid-based corrosion inhibitors, ensuring long-term protection against degradation while maintaining high thermal conductivity and dielectric properties to prevent electrical shorts. The growing EV adoption, coupled with stringent regulations on battery safety and efficiency, is driving demand for high-performance OAT coolants. Key players in the market are focusing on developing bio-based and extended-life formulations to align with sustainability trends and reduce maintenance costs.
