Report Overview

The Fatigue Early Warning System (FEWS) is a technology-driven solution designed to monitor and detect signs of fatigue in individuals, particularly in high-risk industries such as transportation, healthcare, and manufacturing. These systems utilize a combination of sensors, artificial intelligence, and biometric data (e.g., eye tracking, heart rate variability, and facial recognition) to assess alertness levels and predict potential lapses in concentration. By providing real-time alerts, FEWS aims to mitigate accidents and improve workplace safety, making it a critical tool for organizations prioritizing employee well-being and operational efficiency. The market for FEWS is expanding as regulatory bodies enforce stricter safety standards and industries increasingly adopt proactive fatigue management strategies. Key drivers include advancements in wearable technology, rising awareness of occupational safety, and the growing demand for automation in workforce monitoring.
